

Next Level Dentures - In 3 Appointments!

This program will review denture fabrication methods and demonstrate what techniques have changed. The latest in 3D printing processes and materials will be highlighted, demonstrating their strength, accuracy and aesthetics. Additionally this course will review clinical guidelines that make chairside steps easier to accomplish.

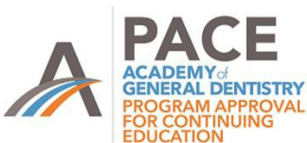

At the completion of this course participants will be able to understand:

- Clinical records - what is needed for success and how to obtain them
- Denture impressions - where we are today
- A simple systematic approach to a 3-appointment digital denture
- Denture fabrication methods and how current CAD-CAM technologies have improved them
- The latest 3D printed denture materials that are stronger than anything ever used
- Utilizing a functional try-in and why it's better
- Removable clinical tips and tricks for a less stressful experience and result

Featured speaker

Jimmy Stegall is a seasoned dental lab operations and management executive with more than 40 years of teaching and clinical experience in the US and Canada. He is a published author and has assisted in research projects with dentists, universities, and manufacturers. After a successful 30+ year career helping to build and lead a large dental lab in South Carolina, Jimmy is now a National Procedural Solutions Specialist for Dentsply Sirona where he has provided over 400 clinical and laboratory training & educational events. As a key opinion leader, teacher, and trainer, Jimmy has a demonstrated history of bringing relaxed, informative, results-oriented strategies and techniques to dental practices and labs throughout the US.
